Saudi Re with Ray

Saudi Re, an insurance company worried about their confidential data, with security being one of the most important needs used Ray Wireless Access Points – Vega. Along with Guest Portals and Enterprise Policy, Ray helped them with their complete Wi-Fi set up that provides great connectivity and embedded security.

Requirements

- › Authentication/NAC of BYOD as Saudi Re did not want any Wi-Fi usage without the IT admin approving the BYOD.
- › Saudi Re has to keep a history of each employee's browsing data for security Audit purposes.
- › Saudi Re has guests visiting the premises regularly and especially during board meetings. The requirement was a way to provide internet, post secure authentication to the guest whilst keeping the enterprise network isolated and secure.
- › To create 3 categories of employees, i.e. workers, office employees and executives to differentiate the internet experience between them.

Solution

- › Ray provided cloud-managed Indoor Wireless Access Point – Vega.
- › Ray provided the Pro bundle which includes Captive Portal, CISO Report and deep network insights along with all Enterprise features.
- › Ray enabled device Whitelist policy for BYOD.
- › Ray created 3 groups: Executives, Employees and Guests.
- › Ray enabled individual content, speed & quota policies to provide different internet experience to the users.
- › Ray enabled CISO Report.
- › Ray created a Guest SSID with Voucher Captive Portal.

Key Takeaways

- › Ray Vega Indoor Wi-Fi access point provides the best coverage and speed suitable for the Enterprise environment.
- › Ray enabled device Whitelist policy to ensure “No device can log in to the internet without the prior approval of IT admin, enabling strong BYOD policies”.
- › The voucher-based Captive Portal provides branding while creating network isolation for guest network and making a secure authentication for the guests.
- › The Content Policy to filter objectionable (non-office) content. E.g. criminal sites, Porn, P2P etc.
- › The Speed and Quota policy to provide different internet experience to different groups.
- › Deep Insights provide history from web and application angles, Risk and Compliance, Traffic Pattern and network actionable of their network.
- › The embedded security protects the Network on the Edge by filtering Malware, Ransomware and Spam.
- › A weekly detailed network summary CISO Report sent to them in a PDF report format highlighting all summary of the week from a network perspective.
- › The Audit feature fulfils the Audit requirements of the industry.
