

Position: Network Engineer

Location: Ahmedabad, India

Employment Type: Full-time

Level: Fresher

Industry: Information Technology & Services | Computer Networking | Software

About Ray

Ray is an innovation-driven technology company redefining enterprise networking. We build secure, cloud-managed connectivity solutions—including SD-WAN, Wi-Fi, and NGFW—tailored for modern distributed enterprises. Our platform is trusted by large BFSI, retail, education, and hospitality organizations.

Qualifications & Certifications

- Advanced Certifications: **CCNP, CCIE, Red Hat, or equivalent industry credentials**

Knowledge

- Knowledge and conceptual clarity in enterprise networking, **SD-WAN and Wireless network** architecture and deployments

Work Schedule

- **Monday to Saturday (10 AM to 7 PM India Time)**
- Extended availability required for high-priority escalations and deployments
- Flexibility to transition to a 5-day rotational shift schedule in the future, based on business needs

Key Responsibilities

A. Technical Leadership & Collaboration

- Collaborate with other engineers and partner teams on best practices and troubleshooting
- Collaborate with product engineering to provide structured technical feedback
- Represent networking in cross-functional initiatives (cloud, security, performance)

B. Deployment & Optimization

- Lead full-cycle deployments: design, POC, rollout, performance optimization
- Ensure operational excellence through documentation and governance of standards
- Evaluate network management and monitoring solutions for proactive performance insights

Core Technical Skills

- Understanding of: **DNS, DHCP, VPN, IPSEC, BGP, OSPF, HSRP, 802.11, 802.1x, SNMP**
 - Knowledge in **enterprise firewalls** (Sophos, Palo Alto, Fortinet, pfSense)
 - Knowledge of **cloud networking**: AWS, Azure, hybrid connectivity models
 - Integration with **identity-based authentication** (Cisco ISE, AD, Radius, LDAP)
 - Familiarity with network automation and scripting (e.g., Python, Ansible)
 - Use of tools like **Wireshark, SolarWinds, Cisco Prime, Panorama** for diagnostics
 - Strong technical documentation and communication skills
-

What You Bring

- Ownership mindset and problem-solving leadership
 - Ability to work across technical and business teams
 - Passion for scalable, secure, and modern networking
-

Why Join Ray?

- Be a key contributor to India's next-gen cloud-managed networking platform
 - Lead large-scale projects and influence product direction
 - Competitive compensation, high-growth environment, and innovation-led culture
-
